

Two Important
Black-and-White Films

Kodak

Two for the many:
KODAK TRI-X Pan Film
KODAK PLUS-X Pan Film
Right for almost every job

KODAK TRI-X Pan Film

Sharp enough for big enlargements, detailed enough for good mechanical reproduction, and with all the tonal quality you need for portraits. Excellent detail in shadow and highlight. Wide latitude, of course. Plus all the spoolings and sheet sizes you need.

KODAK PLUS-X Pan Film

The bigger the blowup, the more you need it. You'll love it for its extremely fine grain. Fine in sunlight or under floods in the studio. You couldn't ask for crisper, cleaner tones. In rolls and sheets.

We stock these, as well as all other Kodak black-and-white films. Call us for products, service, literature, and consultation on all things photographic.
